8. Soils	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Revegetation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
10. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**Purpose of Inspection:**

Routine Inspection while in the area.

**Inspection Summary:**

Permit fees have not been paid this year, however with the site having been reclaimed, permit fees would be waived.

This site has been reclaimed. All equipment, trailers, vehicles, trash, and rock have been removed from the site. The area has been seeded, as evidence of the seeded species growing. These included crested wheatgrass, slender wheatgrass, sagebrush and rabbit brush (volunteer species included halogeton, Russian thistle, and cheatgrass, but only in minor amounts). Vegetation ground cover of desirable species exceeds the 70% reclamation success standard.

Photos were taken to document site conditions.

**Conclusions and Recommendations:**

The Division is currently holding a surety (LOC) for \$11,711 for this site. This site is on BLM land. Since this was an off-site mill area, permitted by DOGM only because the BLM required the operator to have a mining permit to validate their mill site claim. On December 8, 2009, the Division received concurrence from the BLM to close this file and release the surety.
